Bankability™

## The First Virtual Banking System for Special Education Students

Bankability allows students to experience a modern banking app while learning financial literacy and workplace behavior.

Online Banking is Here!

Bankability works with The Digitability Social Economy, where students earn (and later spend) virtual money for practicing workplace behavior. With Bankability, students now receive direct deposits on payday, review pay stubs and personal bank statements.

Earnings

Gross Pay	$252.00
Net Pay	$200.00

Date 02/17/21
PAY TO THE ORDER OF Student $ 300.00
300 Dollars
000000000   1206

Checking: $300.00   **Savings: $100.00**

Bankability™

Pay Bills and Purchase Rewards

Using Bankability, students manage their checking and savings accounts, pay bills, shop, and review their finances all from their online bank account. Teachers can customize classroom bills and rewards, run payroll, and approve purchase requests all from their Bankability dashboard.

Data & IEP Progress Reports

Bankability also allows teachers to track workplace readiness progress using Digitability's Individual Education Program (IEP) Transition Goal Bank. Assigning each dollar to a behavior will allow teachers to track that behavior overtime. Reports can be generated at the click of a button and shared with their Special Education Team.

Bankability: School-Wide Behavior Management with Virtual Banking

Digitability™
Be Work Ready!

What is Bankability and the Social Economy?

Digitability's award-winning life skills curriculum launched its newest product Bankability, which allows students to experience a modern banking app while simultaneously learning financial literacy and positive behaviors. Bankability is implemented through scripted lesson plans that are designed using the best evidence-based practices for behavior support.

How can Bankability help your school/classroom climate?

Not only can Bankability improve student behavior in the classroom environment, but it can also be used as a school wide tool! If multiple teachers throughout a school are all using Bankability, then students are receiving consistent reinforcement across environments for positive behaviors. This can lead to greater student success. Overall, the use of Bankability will promote a school-wide culture of positive behavior using real-world skills and contingencies.

Why is Digitability offering this discounted pilot opportunity?

As an award-winning company with schools in 30 states and two countries, we are already a leader in delivering training and curriculum for special education classrooms through our life skills and work-ready curriculums.

Our newest feature, Bankability, has been gaining nation-wide attention from general education teachers. As a result, we have been inundated with requests to make it available as a stand alone product for teachers who need to find streamlined systems that manage classroom behavior, and teach real life skills.

How is Bankability different from other behavior programs?

Bankability is the first program of its kind combining real-world life skills development and classroom management. Many other programs award points or use concepts that are not age-appropriate for students. With Bankability, teachers have all the tools they need to create a successful Classroom Economy that teaches and reinforces real-world life skills.

Creating a classroom economy is made simple with Bankability. Each teacher has access to a 1-1 coach to help individualize their Social Economy to best meet the needs of their students. Your coach can help you determine what reinforces your students, and helps build your classroom economy around that.

Bankability: School-Wide Behavior Management with Virtual Banking

What tools will my teachers have access to?

- Virtual banking app with teacher and student logins
- Scripted and differentiated lesson plans and supplements (print and digital)
- Data tracking by specific behaviors and goals
- Pay stubs and bank statements
- Checking/savings accounts
- Budgeting tools
- Shopping for rewards and paying bills online
- On-demand support and coaching
- …and more!

How much will it cost to participate in this pilot?

Digitability is looking to further understand the needs of upper elementary, middle and high school teachers when it comes to creating a token economy system in their classroom. In exchange for teacher insight, we will extend a discounted student license rate at $29.95/student plus discounted training and support fees. Contact us today to get a free quote.

What kind of support will my teachers receive?

Every teacher works one-on-one with a personal coach to support classroom facilitation. Coaches are proactive and teachers can also request support as often as needed! We make sure that teachers are given the tools they need to succeed and do not overwhelmed with a lot of information. We make sure that teachers feel comfortable getting started. Coaches work to empower every teacher with new technology skills, the best, evidence-based practices for supporting behavior and creating personalized classroom economies during coaching sessions.

How much time will it take to get this program started?

Bankability is easy to implement! To get started, all teachers have to do is enter the bills and rewards that are customized to their classroom. Once entered, students will be able to make purchase requests for rewards and the bills will automatically be issued to students twice a month. Once Bankability is set up, the only time commitment for teachers will be entering daily dollar amounts for students. While this will only take a few minutes, it is a job that can easily be completed by support staff members or even students!

What is the time commitment required to participate in the pilot?

Each participant will be asked to implement Bankability for a minimum of one year. During this time, teachers will agree to meet with a Digitability Implementation Coach at least once each month (but will have access to their coach at any time), to discuss their experience. Additionally, teachers will be asked to complete a short monthly survey.

Is this program evidence-based?

Yes! Multiple evidence based practices are naturally embedded in the program. Practices such as reinforcement and least to most prompting are built into Bankability, leading to successful behavior change. Plus, teachers will also have access to our Implementation Coaches that are Board Certified Behavior Analysts.

When will we need to purchase it?

We will be accepting schools on a first come, first serve basis until slots fill up. Contact us today to save your spot!
