

Digitability™

Work Simulation Phase 1: Technology Considerations

Digitability™

WORK SIMULATION PROJECT

TECHNOLOGY CONSIDERATIONS

In this work simulation project, it is best to plan ahead what technology you want to introduce to students.

CONSIDERATIONS

1. **What technology have students used in your class or other courses?**
2. **What technology are you confident in using and explaining to students?**
3. **What technology do you want to use with your students with the support of your Digitability Implementation Coach.**

Digitability™

WORK SIMULATION PROJECT

TECHNOLOGY CONSIDERATIONS

1. Students build their skills through the work experience.
2. Students are given opportunities to reflect on their work skills.
3. Students create assets to showcase their work skills in order to get a job.

WORK SIMULATION PROJECT TECHNOLOGY CONSIDERATIONS

- Look at these options and consider the best route to take with your students.
